

California Prop 65 Declaration

To the best of our knowledge, all pumice and perlite products, whether in raw or processed form and produced at our facilities, do not contain any contaminants or byproducts known to the State of California to cause cancer or reproductive harm (toxicity) as listed under Proposition 65 State Drinking Water and Toxic Enforcement Act.

Additionally, through third-party testing methods, the crystalline silica content of these materials has been determined to be below detectable limits and therefore our pumice products do not contain crystalline silica particles <10 μm in size.

A handwritten signature in blue ink, appearing to read "Brian K. Jeppsen".
